

Statement Concerning Environmental Labelling according to Decision 97/129/EC

Product: **Samples of different products**

Samples of products are packaged with different materials listed below:

Description	Environmental labelling
white sampling containers with lids in different sizes	sampling container: PP 5 lid: LDPE 4
transparent plastic sampling containers with lids in different sizes	sampling container: PP 5 lid: exact composition has not yet been provided by supplier
plastic sampling bottles with lids in different sizes	sampling bottles made of PE in stock, exact composition has not yet been provided by our suppliers
glass sampling container with lid	sampling container: GL 70 lid: exact composition has not yet been provided by supplier
glass sampling bottle with lid	sampling bottle: GL 70 lid: exact composition has not yet been provided by supplier
insulating box	exact composition has not yet been provided by supplier
blue plastic films	LDPE 4
transparent plastic bags	OTHER 7 or LDPE 4
cabie tie	cabie ties made of plastic in stock, exact composition has not yet been provided by our suppliers
cardboard boxes	PAP 20, PAP 21
inner part of cardboard boxes	fleece, straw exact labelling code has not yet been provided by supplier
adhesive tape	adhesive tapes made of different materials in stock, exact composition has not yet been provided by our suppliers
packaging chips	exact composition has not yet been provided by our suppliers
bubble wrap	usually LDPE 4, can differ because of different suppliers

We use up our remaining packaging stock from the warehouse. Packaging which was produced or placed on the market before 31st December 2022 can still be used and does not need updated environmental labelling. The labelling of transport packaging material can also be stated on the transport documents and does not have to be applied directly on the packaging material.
